

Spreader Beam

The crane/excavator slung Spreader Beam is an ideal attachment for the lifting and laying of rolls of liners as used on land fill sites, man-made ponds, bankings etc.

Standard Features:

- Main spreader bar 250mm wider than core bar length
- Set of two drop chains
- 2 leg chain with single lifting ring
- Painted bright orange for safety

Model	Capacity (kg)	Core bar length (mm)	Core bar dia (mm)
